

WEB LISTING

90% of customers search online for a business like yours. You show up on all sorts of places such as Google, Apple, Waze, Here, Uber, just to name a few.

During these challenging times it's really important that your customers can find the right information about your business online, such as, changed opening hours, delivery services, what services and products you still sell and much more.

But managing all this information is a difficult task, that's why Network Business Call has launched Netcomms Listings. One single platform for you to add and update all your company information all in one go. With one click we publish this information for you on more than 50 online platforms so that customers can find you everywhere. Besides that, Netcomms Listings will result in more website traffic, phone calls and visitors to your location to keep your business on track.

As 76% of online searches result in a visit within 24 hours, can you afford not to put your business on the map?

At Network Business Call we strongly believe in the importance of maintaining an updated online presence, especially during these challenging times.

We offer the first two months free of charge and thereafter a monthly subscription fee of £8.99 per month.
